Celebrating our 50th year

There have been so many changes over the last 50 years, but Rocky Gas has been a staple of our community throughout. We are a non-profit, member owned organization, founded on the principle of providing affordable natural gas for the betterment and advancement of our rural community.

The Co-op is focusing on our future, making sure we have a reliable system that will continue to service our members. We are investing in new technology to better monitor and maintain our network, ensuring a constant supply of gas from summer barbeques to cold winter nights.

If you see our employees working nearby be sure to say hello! To celebrate our 50th year of being Your Rural Natural Gas Provider we have special edition branded hats, pens, umbrellas, tote bags, and much more to give away to our members.

Information out of date?

Long driveway with a gate? Please let us know how we can get to your meter in case of emergency. Contact us to update your phone number, email, or emergency contact information.

Fall & Winter 2022

We have the power!

This construction season we were able to work with Fortis and our friendly neighbours, Blue Mountain Power Co-op to install direct power at 5 stations. This more reliable setup replaces solar and battery operated monitoring systems at our RMO (reducing, metering, and odorizing) stations. In future construction seasons we will convert more stations to direct power.

Uninterrupted power at an RMO

Welcome, Lenore!

2022 Co-Op Improvements

- Installed over 21,000 metres of pipe including new loop lines
- Added 35 new members and completed 25 secondary installations
- Replaced 3 old, outdated, and undersized RMO buildings
- Replaced 1 line heater
- Power upgrades to RMO stations
- Major upgrades to station 85 near Devil's Elbow
- Increased internet speed and reliability at our office
- Welcomed Lenore Woitas to our administrative team
